PROFESSIONAL SUMMARY

Junior Flutter Developer with hands-on experience building cross-platform mobile applications using Flutter and Dart. Proficient in Firebase Authentication, Firestore, Storage, REST API integration, and state management using Provider and BLoC patterns. Delivered real production applications through internship and academic projects with focus on clean UI/UX, performance optimization, debugging, and maintainable, scalable architecture.

TECHNICAL SKILLS

- Flutter • Dart
- Firebase (Authentication, Firestore, Storage)
- REST API Integration & JSON Parsing
- State Management: Provider, BLoC, Cubit
- Google Maps API & Location Services
- Git & GitHub Version Control
- Debugging, Performance Optimization & Testing
- Cross-Platform Mobile App Development (iOS & Android)

PROFESSIONAL EXPERIENCE

Flutter Mobile App Developer (Intern / Junior)

KTM Bees, Nepal

February 2025 – Present

- Develop cross-platform mobile applications using Flutter and Dart targeting both iOS and Android platforms.
- Implement Firebase Authentication, Firestore database, and Cloud Storage for secure user management, real-time data syncing, and media handling.
- Apply Provider and BLoC state management patterns to build scalable, maintainable, and testable application logic.
- Integrate and consume RESTful APIs to fetch, process, and display dynamic content efficiently.
- Perform debugging, performance profiling, and optimization to ensure smooth user experience and minimal crashes.

Production Assistant

Chandika Print Pack, Kavre, Nepal

April 2020 – January 2024

- Assisted in production planning, documentation, quality assurance processes, and daily operational workflows.
- Collaborated with cross-functional teams to maintain accurate records and support efficient manufacturing schedules.

PROJECTS

HeritEdge – Cultural Heritage Preservation Mobile App

- Engineered a full-featured Flutter application allowing users to discover, explore, and contribute cultural heritage sites across Nepal and beyond.
- Integrated Firebase Authentication for secure user login/signup and Firestore for real-time data storage and retrieval of heritage information.
- Implemented Google Maps API with markers, location search, and navigation to enable geospatial discovery and user contributions.
- Built contribution module supporting image upload to Firebase Storage and admin approval workflow with status tracking.
- Utilized BLoC pattern for robust, event-driven state management across complex multi-screen flows.

Tech Stack: Flutter, Dart, Firebase (Auth, Firestore, Storage), Google Maps API, BLoC

Mini Flutter Application (Production-Style Demo App)

- Created a complete Flutter app featuring user authentication, dynamic content from REST APIs, and responsive layouts.
- Designed mobile-first, adaptive UI compatible with various screen sizes and orientations.
- Implemented state management using both Provider and BLoC to demonstrate clean data flow and separation of concerns.

EDUCATION

Bachelor of Computer Application (BCA)

Kabhre Multiple Campus, Tribhuvan University

2021 – Present (Ongoing)

LANGUAGES

- Nepali – Native

- English – Conversational (Professional working proficiency)
- Hindi – Conversational
